NUMBER OF COUNTRIES USING NASIOL PRODUCTS

145+

DEALERS

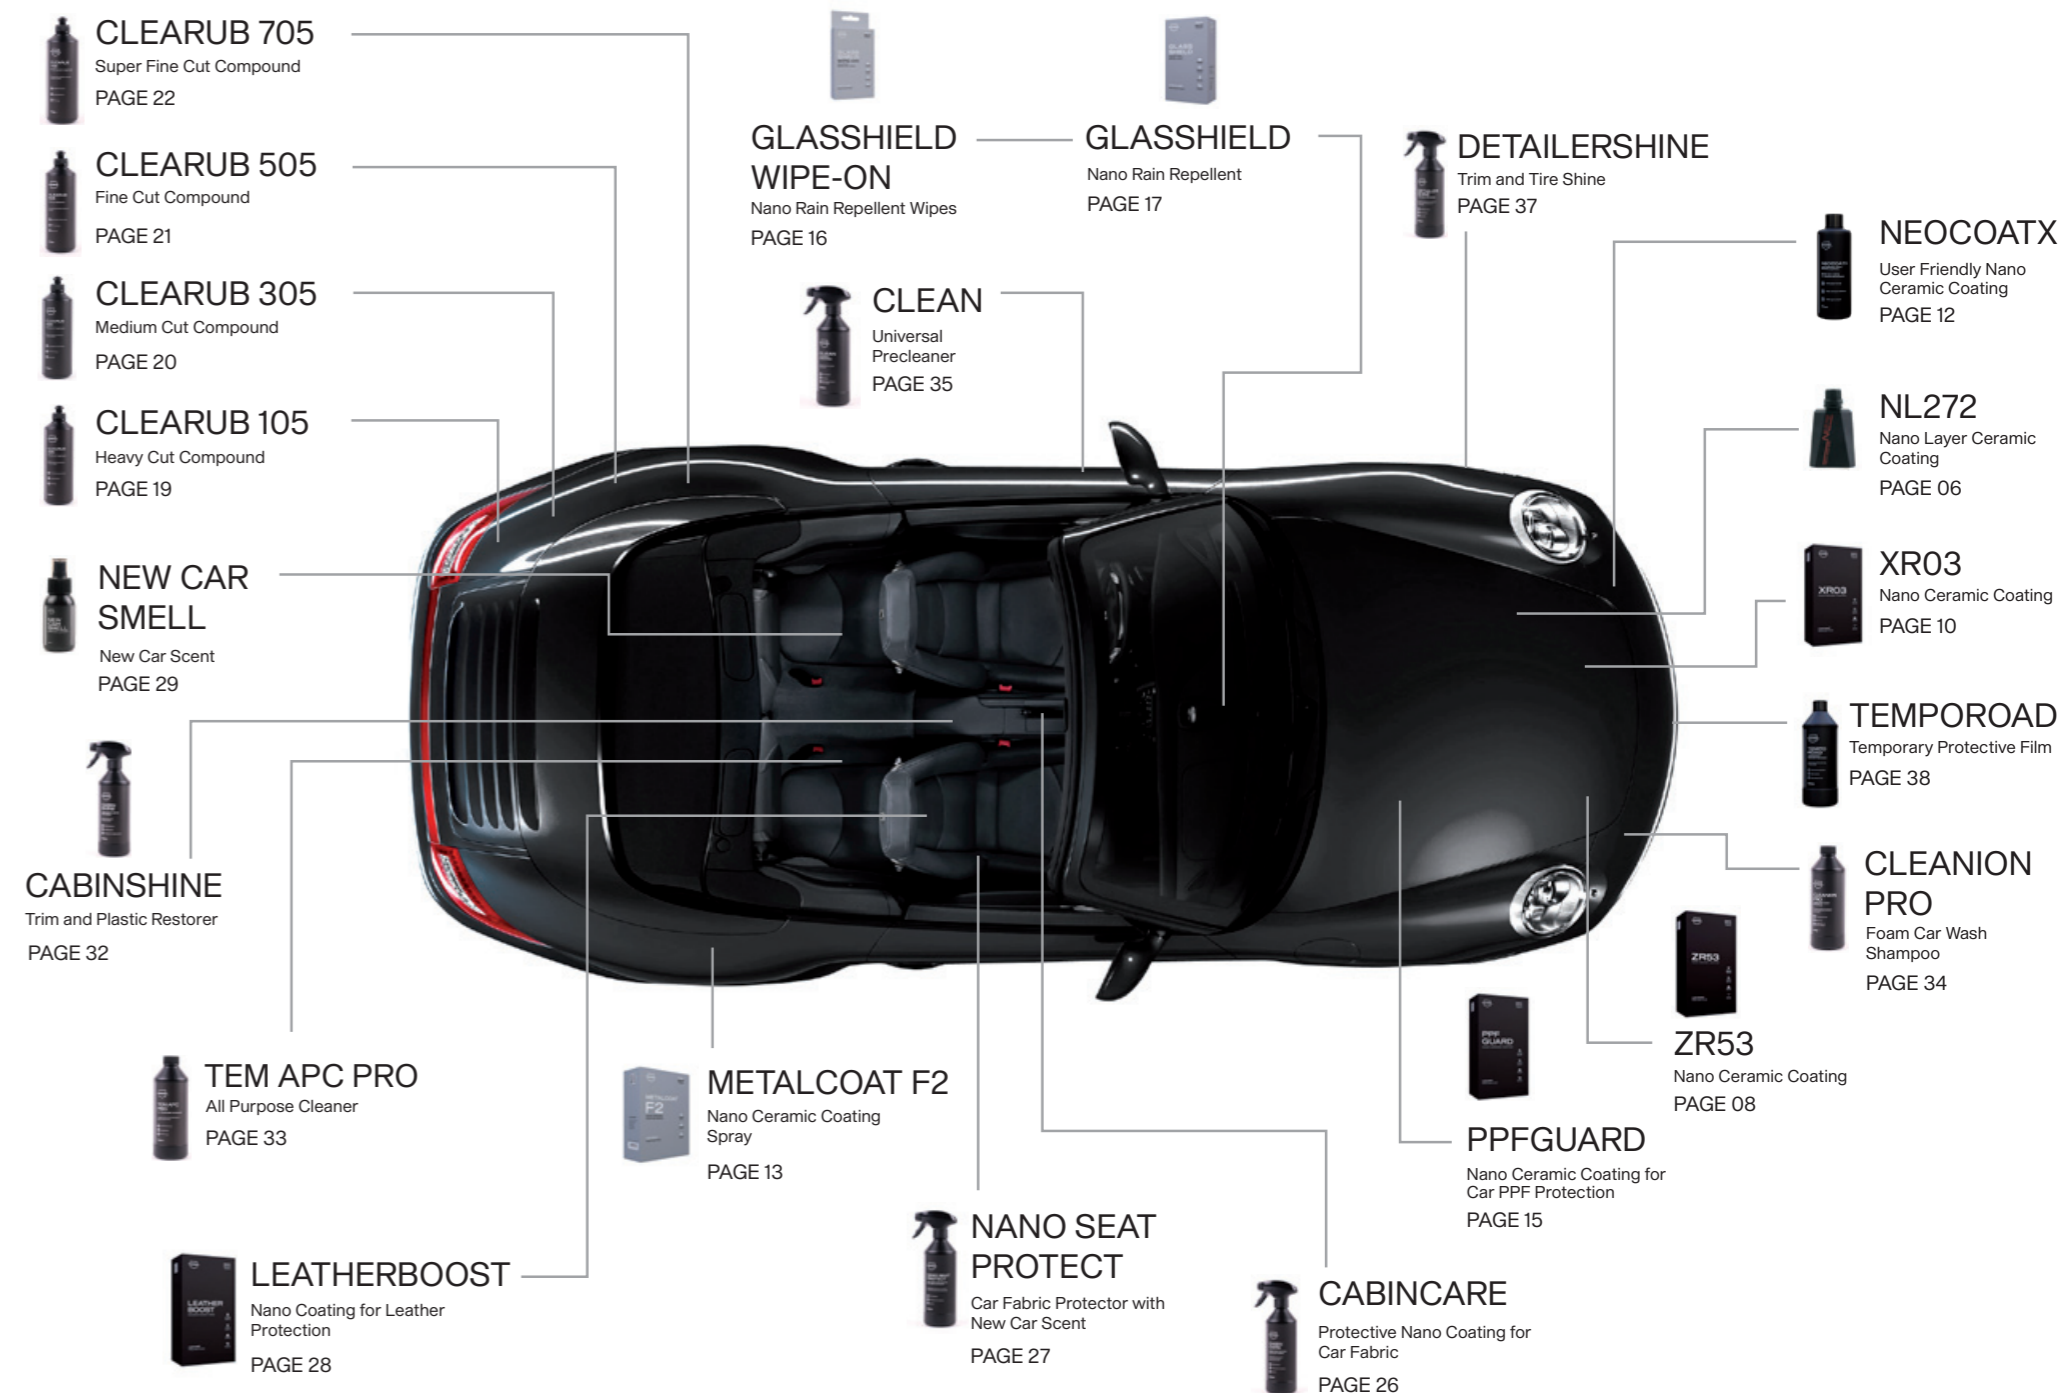

500+

NASIOL, is the world's leading producer of surface protection solutions using the latest developments in nano technology.

Nasol's specially formulated products are widely used in the automotive, industrial, home, textile, personal accessories, and maritime sectors. In the automotive sector, Nasol products are widely sold in over 145 countries.

Nasol's products are distributed globally through hubs located in the Czech Republic, USA and Turkey R&D Center and Head Office.

Every single one of our Nasol products goes through an extensive quality control process before being shipped out.

CAR EXTERIOR CARE

NL272

Nano Layer Ceramic Coating

50mL

WHY NL272?

- First in its class with a High Definition Reflection (HDR).
- Long-Lasting 9H Scratch Resistance.
- Full protection with a single layer of coating.
- Extreme durability with protection up to 5+ years.
- Recommended for skilled detailers.

Within the nano-ceramic coating category, NL272 is the premier force. Nasiol NL272 delivers long-lasting, unrivaled super hydrophobic traits, along with mirror-shine gloss that restores the paint and awakens the color.

Ultimate Protection Performance

With a single application, NL272 forms a smooth single layer of hard nanoscale coating on the surface, protecting against scratches, retention of dirt and dust, and staining caused by environmental conditions, such as bird droppings. NL272, with its ultra-high gloss finish, rejuvenates the original color of the surface and ensures the vehicle has an attractive look.

ZR53

Nano Ceramic Coating

50mL

WHY ZR53?

- TÜV Certified formula for 9H pencil hardness.
- No special equipment required, everything is included in box content.
- Up to 3-years of enhanced durability.
- Crystal Gloss Reflection (CGR) with a distinct silky feeling.
- Recommended for professional detailers.

Nasiol ZR53 is a supreme formula to shield the auto paint from unexpected scratches and defend it with various adverse impacts caused by acid rain, bird droppings, road salt, and damaging sun rays. Minor or deep, autobody scratches will diminish the look, cost expensive repairs, and reduce the value of your car. One way to prevent all this is to take preemptive action by protecting the vehicle surface with the ZR53 nano ceramic compound.

9H Nano Ceramic Coating

With its 9H surface protection formula, ZR53 forms a slick single layer reinforcement to combat against scratches and potential harm caused by mud, ice, snow, harmful sun rays, and various other elements of nature.

Not only will the surface be guarded against scratches, but the body of your vehicle will also acquire a silky tactual feeling, with crystal-gloss shine.

XRO3

Nano Ceramic Coating

50mL

WHY XRO3?

- No special equipment required, everything is included in box content.
- Up to 18-months of advanced durability.
- Super gloss effect with high water repellency.
- High scale resistance against destructive chemicals.
- Recommended for professional detailers.

Nasiol XRO3 coated surfaces achieve to a high hydrophobic surface and enables you to clean your car easily and with less time and energy.

Easily Applicable Car Paint Protection

Nasiol XRO3 has a super formula to shield the car paint from scratches and defend it against acid rain, bird droppings, road salt, and damaging sun rays. It rejuvenates the original color of the surface and ensures the vehicle has an attractive look.

NEOCOATX

Nano Ceramic Coating

100mL

WHY NEOCOATX?

- Easy to apply through flexible flashing time.
- High scale resistance against chemicals.
- Up to 6-months of advanced durability.
- Recommended for detailing enthusiasts.
- Up to 5 cars can be coated.

Nasiol NeoCoatX is an easy applicable nano ceramic coating that combines ultimate NASIOL technology with user-friendly traditional coating methods.

Naisol NeoCoatX applied to your car ensures a protective layer against UV rays, strong chemicals, bird droppings and road salt. It delivers long-lasting, high hydrophobic traits, along with deep shine that awakens the paint color.

METALCOAT F2

Nano Ceramic Coating Spray

50mL

WHY MetalCoat F2?

- Spray it and buff it! A simple worry-free application and cleaning.
- Instant gloss with an exceptional degree of water repellency.
- Perfect for detailing enthusiasts.
- Safe for exterior plastic trims.
- High scale resistance against destructive chemicals.
- Surface protection between 6 to 12 months.

The fastest method of coating a vehicle with a ceramic scratch resistance compound is only possible with MetalCoat F2 spray-on application. MetalCoat F2 can safely treat the surfaces of automobiles, bicycles, motorcycles, and trucks with its unique nano-coating formula by forming a single layer scratch resistance level.

TEMPOROAD

Temporary Protective Film

500mL

WHY TEMPOROAD?

- One of a kind, eco-friendly formula manufactured to prevent bugs, and insects, dust, and sand particles from adhering to your vehicle.
- It can be removed safely without damaging the surface with water pressure.

TempoRoad forms a temporary water-based film to shield the autobody from bug stains and sand from sticking on to the surface in areas where sandstorms are frequent.

Prepare and shield your vehicle from unexpected elements while driving with TempoRoad. This unique compound is perfect for temporary applications.

PPFGUARD

Nano Ceramic Coating for Car PPF Protection

50mL

WHY PPF GUARD?

- Ensures UV and chemical resistance for paint protection films.
- Up to 12-months of durability.
- Super finish with high hydrophobicity.
- No blocking self-healing effect of PPF.
- Recommended for professional detailers.

PPFGuard is a flexible nano-coating product that increases the performance of paint protection films, protects the applied surface against various factors and extends the life of the surface. It is applied in 2 layers and the waiting time between coats is very short.

PPFGuard gives hydrophobic, UV resistance and easy-to-clean properties to film-coated surface without spoiling the physical properties of glossy, matte, and satin surfaces. It prevents the color fading caused by sun rays and does not cause any change in the structure of films with self-healing feature.

GLASSHIELD WIPE-ON

Nano Rain Repellent Wipes

WHY GLASSHIELD WIPE-ON?

- Specifically designed for windshields.
- Compact packaging and easy storage.
- Effortless application.
- Enhances visibility and safety.
- Durable up to 40,000 wiper blades or 1 year of daily usage.
- High durability against detergents and other chemical solutions.

NasIol GlasShield Wipe-On forms an invisible layer on the windshield. With its quick and simple application, it enhances visibility and boosts safety with its remarkable water-repelling formula.

Convenience, speed, and performance are what separates NasIol GlasShield Wipe-On from the rest. The application wipes go on fast and efficiently; regardless of the weather conditions, the blend will form a shield on the windshield surface to produce clear, uninterrupted visibility during rough rainy conditions.

GLASSHIELD

Nano Rain Repellent

50mL

WHY GLASSHIELD?

- All-season protection suitable for all geographical locations.
- Protects the age of windshield and wipers.
- Delays the forming of icing.
- Increases visibility performance for the windshield, side windows, and rear windshield.
- Comes in all in one small packaging for easy storage.
- Up to 80,000 wiper blades or up-to 2 years.
- Applicable for all types of auto glass.

Ultra-high-water repellent formula manufactured to establish safe driving and clear visibility with less reliance on windshield wipers. NasIol GlasShield is a powerful water repellent solution designed precisely for the windshield and glass portions of a vehicle. Safety and visibility are crucial during rainy and snowy weather conditions.

Once NasIol GlasShield comes in contact with the glass surface, the liquid formula will bond and spread to repel water and to turn droplets into tiny beads, thus making the usage of windshield wipers a seldom occurring event.

CUTTING COMPOUNDS & POLISHING PADS

CLEARUB 105

Heavy Cut Compound

500g / 1kg

WHY CLEARUB 105?

- Achieve stunning results by using a small amount.
- Removes severe scratches smoothly.
- Effective on resistant coatings.
- Professional grade ingredients that are safe for any color, make and model.
- Silicon-free.

Prepare the surface of a car body for ceramic coating treatment by eliminating major scratches. Nasidol CleaRub 105 is a heavy cutting compound aimed at rectifying degraded paint works. CleaRub 105 is also ideal choice for finishing works on resistant top-coatings.

Heavy Cut

Lambs Wool

CLEARUB 305

Medium Cut Compound

500g / 1kg

WHY CLEARUB 305?

- Achieve stunning results by using a small amount.
- Removes medium scratches smoothly.
- Effortless application.
- Long-lasting shine with a smooth surface.
- Professional grade ingredients that are safe for any color, make and model.

Prepare the surface of a car body for ceramic coating treatment by eliminating medium scratches. Nasiol ClearRub 305 is formulated to blend with the scratches to make them disappear efficiently. ClearRub 305 is also ideal choice for finishing works on resistant top-coatings and waxes.

Medium Cut

CLEARUB 505

Fine Cut Compound

500g / 1kg

WHY CLEARUB 505?

- Achieve stunning results by using a small amount.
- Removes fine scratches smoothly.
- Effortless application.
- Long-lasting glowing shine with a soft to touch surface.
- Professional grade ingredients that are safe for any color, make and model.
- Silicon-free.

Nasiol ClearRub 505 is a high-tech fine polishing compound that designed and improved for achieving high gloss level. ClearRub 505 can be used on both brand new and old paints.

Fine Cut

CLEARUB 705

Super Fine Cut

500g / 1kg

WHY CLEARUB 705?

- Achieve stunning results by using a small amount.
- Removes minor scratches, swirls, and streaks smoothly.
- Effortless application.
- Exclusive gloss with a hologram-free surface.
- Professional grade ingredients that are safe for any color, make and model.
- Silicon-free.

Nasiol CleaRub 705 is a high-tech finishing compound that designed and improved to remove polishing marks, micro-scratches, and holograms. CleaRub 705 can be used on both brand new and old paints to get deep shine effect.

Super Fine Cut

EXCLUSIVE AIR CHANNEL SYSTEM

Premium polishing pads are designed to remove minor to severe oxidation, swirls, and scratches on vehicle surfaces. The hardness degrees of the polishing pads indicated with colors on the packaging, decrease from burgundy to blue.

Innovative air channel system, facilitate the evacuation of the heat generated during the polishing process and prevent overheating. It protects pads from getting deformed or torn after washing. It is easy-to-applied even in the most curved areas and suitable for both rotary and orbital polishing machines.

Nasiol Backing Plate

CAR INTERIOR CARE

CABINCARE

Protective Nano Coating for Car Fabric

500mL

WHY CABINCARE?

- Guards against spontaneous spills penetrating car seats.
- Simple to apply; spray it and let it dry.
- Increases the lifespan of the seats.
- One application lasts up to 6 months.
- Non-allergic and toxic free formula.

Nasiol CabinCare is a powerful stain repellent solution that is formulated to deter harmful stain-causing substances from the surfaces of fabric base seats and floors.

Nasiol CabinCare is designed to prevent dirt, liquid, and mold from penetrating the fabric, thus preventing staining and making cleaning a breeze. CabinCare also maintains the appearance and breathability of all material.

NANO SEAT PROTECT

Protector for Car Fabric with New Car Scent

500mL

WHY NANO SEAT PROTECT?

- Blocks stains from penetrating the fabric.
- Formula is combined with NASIOL NEW CAR SMELL fragrance.
- Non-allergic and toxic free formula.
- One application lasts up to 4 months/5 washes with approved detergents.

Nasiol Nano Seat Protect serves as a barrier between the fabric surface of the interior of your vehicle and from aggressors that can potentially cause damage, such as spilled drinks, muddy shoes, and wet outfits.

Nasiol Nano Seat Protect, with its fresh fragrance, is the solution that will protect the seats of your vehicle from stain-causing invaders while offering a fresh scent as a bonus.

Heavy-duty stain defender formulated using the latest advancements in nanotechnology, with a long-lasting new car fragrance in a portable spray bottle.

LEATHER BOOST

Nano Coating for Leather Protection

150mL

WHY LEATHERBOOST?

- It will protect the leather surface from water and liquid stains.
- Can easily be applied using the applicator block with suede cloth.
- Extends the life-span of interior leather components on automobiles, RVs, trucks, boats, and other watercrafts.
- Designed with a new cutting-edge formula using nanotechnology.
- Only a small amount is required to cover an extensive section with significant results.

Maintaining leather surfaces in your automobile is essential for extending the life-span of the material. Choosing the right solution in preserving leather products can significantly impact the look and feel of the interior. LeatherBoost protects artificial and genuine leather from fading and staining, all the while preserving its authentic color and smooth touch.

NEW CAR SMELL

New Car Essence

50mL

WHY NEW CAR SMELL?

- Easy application for long-lasting essence.
- A fresh and clean fragrance that will reveal the spirit of a new car.

Excite your senses with fresh and long-lasting new car fragrance.

Remember the very first time you step into your new car, and the fragrance of new car hit your senses? After a while, the scent inside of your new vehicle fades away. But what if it didn't? What if you can continue having the feeling of stepping into a new car, regardless of how long it has been since you bought your vehicle?

Nasiol New Car Smell spray gives the interior of your car the exact new car fragrance. It is easy to apply. Just spray it, and the scent will remain in your vehicle, and the memories will rejoice you every time you step into your car.

CLEANING AGENTS & DETAILING PRODUCTS

CABINSHINE

Automotive Interior Safeguard

500mL

WHY CABINSHINE?

- Revitalizes the plastic, rubber, and vinyl parts of the interior of the vehicle.
- It repels dust and dirt build-up.
- Illuminates the interior parts and keeps your automobile looking newer.
- It extends the life of interior vehicle components.

CabinShine shields the interior plastic materials from sunlight and helps to combat premature aging and discoloration.

The dashboard, glove box, console, door handles, are all prone to dust, aging, and fading. To prevent interior plastic, rubber, and vinyl parts from deteriorating, protecting them with a specially formulated solution like CabinShine is required. CABINSHINE is advised to be used after cleaning the surfaces with Nasiol TEM APC Pro.

TEM APC PRO

Strong Multi-Purpose Cleaner

500g

WHY TEM APC PRO?

- Removes tough stains with minimal effort.
- The compound does not leave a chemical residue after cleaning is complete.
- Does not contain toxic chemicals that are hazardous to human health.
- 1/45 min. dilution

TEM APC Pro is a mighty interior cleaner designed to wipe out dirt and stains on the surfaces of car seats, flooring, plastic sections, and roof interior.

Stubborn stains that are impossible to remove with soap and water require a mixture that is strong enough to expel the stains without causing damage to the surface or surrounding areas.

From automobile flooring to car seats, to the roof of the car, TEM APC Pro will eliminate persistent stains from the surface without the need for extra cleaning equipment.

CLEANION PRO

Foam Car Wash Shampoo

500g

WHY CLEANION PRO?

- Concentrated formula clears away stains, such as dirt, mud, salt remnants, water spots, and bird droppings from the surface of a vehicle.
- Safe to use on surfaces treated with sealants, wax, and ceramic coating.
- Before treating the surface with a Nasiol nano ceramic coating cleaning the auto body with Cleanion Pro will allow the user to get the most out of the ceramic coating solution.
- 1/60 min. dilution

Cleanion Pro is a remarkable car wash detergent formulated to wipe out stubborn dirt and stains without hassle. Hard abrasive chemicals along with firm brushes might sound like a good idea to remove stains and dirt from the body of your vehicle; however, you are doing more harm than good. Using a balanced, concentrated formula like Cleanion Pro, will not only effectively remove dust, mud, and bird droppings from the surface, but it will do so without damaging the paint or the coating.

CLEAN

Universal Precleaner

500mL

WHY CLEAN?

- Excellent solution for surface preparation before Nasiol nano ceramic applications.
- Helps to get the maximum benefits out of the ceramic coating solution.
- Removes polishing residue particles from the surface.
- Clean is a perfect companion to eliminate dirt, dust, mud, and various stain residue from the surface efficiently.

It helps to remove contaminants on hard surfaces before nanoceramic treatment.

Preparing the surface before applying a ceramic coating compound is essential to getting the most out of the product.

Nasiol Clean is one-of-a-kind; the gentle surface cleansing solution works to whisk away dirt, dust, and stains to prepare the way for nano ceramic application.

DETAILER SHINE

Trim and Tire Shine

500mL

WHY DETAILERSHINE PRO?

- Long-lasting stunning shine.
- DetailerShine clears dirt and mud without much effort.
- It makes future maintenance and cleaning of the surface easier.
- No need to use a pressure washer to clean.

DetailerShine is an exclusive formula to clear dirt and grime from the tires while giving them a fantastic shine.

DetailerShine restores the original color of tires and the trim portions with its powerful deep glaze formula, and it makes removal of dirt a breeze for future cleaning.

TEMPO ROAD

Temporary Protective Film

500g

WHY TEMPOROAD?

- Eco-friendly formula manufactured to prevent bugs, and insects, dust, and sand particles from adhering to your vehicle.
- It can be removed safely without damaging the surface by pressure washing or peeling off.

Nasiol TempoRoad creates a water-based transparent film on surfaces and provides temporary protection against scratches caused by sand, stone chips, and tar etc. while ensuring UV resistance property to the surface. It can be applied easily and removed simply from your vehicle by foam lance washing, pressure washing or peeling off.
